**Subject:** NYAS Proposal

Stephanie:

The CPG has retained and contracted with the New York Academy of Sciences (NAS) to conduct a survey of the ongoing sources to the Lower Passaic River using the methodology that was previously employed and documented in their report in the approach outlined in Safe Harbor: Bringing People and Science Together to Improve the New York/New Jersey Harbor, Collaborative Problem Solving Using An Industrial Ecology Approach, January 2008 that was implemented during the NAS NY/NJ Harbor Project. I have attached a copy of the NAS proposal.

The CPG believes that this approach when focused on the Lower Passaic will support the development of the Conceptual Site Model for the LPRSA; contribute to the development of the LPR/NB Model; and may aid in EPA/CPG discussions on background and reference information for the Risk Assessments.

I understand that Geoff has already mentioned this to Ray and provided him a copy of the proposal.

Please let me know if you have any questions and want to discuss this with me.

R/

Rob
